As a fresher with a strong foundation in JavaScript, HTML, CSS and other web technologies, I am eager to bring my passion and enthusiasm for web development to your team. I am a fast learner, committed to staying current with industry trends, and a collaborative team player.

INTERNSHIPS

INEURON | Front-end Developer

Dec 2022 - April 2023 | Bangalore, India

ResumeHub - resume builder

- In this internship I worked on a Resume builder project and created a full-fledged resume builder web app from scratch using React and tailwind.
- I have used vitejs for faster speed. Increased project enhancement by 20%.
- Users can easily get their resume after filling out a form and its ready just select the design and download in just one click.

INEURON | Front-end Developer

Jan 2023 - Feb 2023 | Bangalore, India

Scommerce e-commerce store

- In this internship I worked on an e-commerce project and created a store from scratch using React and tailwind.
- Users are able to add a product to the cart remove it from the cart and search products by category.

Projects

Stranger store | (Firebase, ReactJs)

- In this project I worked on an e-commerce brand store and created a full-fledged e-commerce store web app from scratch using React and Tailwind.
- Used Firebase services for authentication and database.

SmartKabadi | [React-native, Firebase]

- In this project I worked on app which simplify the process for collection of used materials by ragmans.
- Used purely [React-Native , Firebase].
- In this app user can upload data of their used product which they want sell with their location and through that ragman can easily approach them

Basic Single page Clone [P a y t m , S h o p i f y , R o d e]

- These are clones of well-known websites' Homepage.
- Used purely [HTML & Tailwind CSS].
